

Structure

Definitions

- A **Learning Block** refers to broad knowledge/practice domain within Community Health (e.g., infectious diseases) (duration: from 2 weeks to up to 2 months)
- A **Module** refers to a broad knowledge/practice sub-domain within Community Health (emerging infectious diseases and epidemics) (duration: from 1 to 2 weeks).
- A **Topic** focuses on a specific aspect of the module (e.g., community-based surveillance of infectious diseases) (duration: from 1 to 2 hours).
 - ➔ Each Topic comprises a **“Watch & Learn”** video-presentation (e.g., video-lecture, expert interview) complemented by one or more exercises (e.g., in video-quiz, drag & drop, fill in the blanks) and other **“Exploring further”** additional resources (external videos, articles, trainings, etc.)
- **“Reflect, Collaborate & Discuss”** are individual or group reflection activities, analysis leading to a production (duration: 30min to 1hr)
- **“Discover & practice”** are field workshops led by operational partners and involve practical sessions outside the classroom (duration: 1 or several days)
- **“Speak up !”** are weekly online meetings where participants meet experts and can ask their questions (duration: 2hrs)
- **“Test & go”** are assessments based on close ended questions adapted from module exercises (duration: 20min to 40min)
