MODULE 2

PUBLISHING AN ARTICLE: HOW TO MAKE AN INFORMED CHOICE?

Vincent.Huber@unige.ch
Audrey.Bellier@unige.ch

Winter 2020

LIBRARY

**UNIVERSITÉ
DE GENÈVE**

PROGRAM

- Scientific publishing process
- Open Access models
- Research evaluation
- Get visible!
- Study cases

SCIENTIFIC PUBLISHING PROCESS

A FEW DATES

1665 First formal scientific journals

- ❑ Journal des savants
- ❑ Philosophical Transactions of the Royal Society

1772 1st peer-review (Royal Society of Edinburgh)

1893 British Medical Journal → peer-review

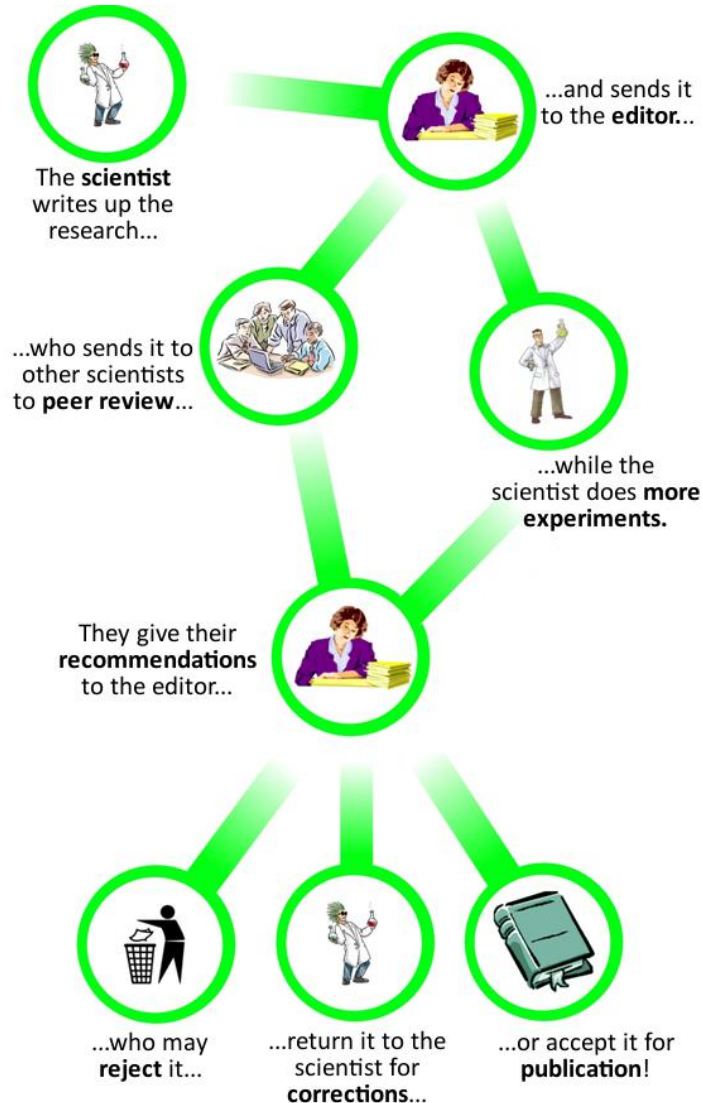

1964 Nature → peer-review

2006 PLOS ONE → 1st non-selective peer-review

<http://gallica.bnf.fr>

TRADITIONAL PEER-REVIEW

PUBLICATION PROCESS / ARTICLE VERSIONS

NEW TENDENCIES IN PEER REVIEW

- Interactions during pre-publication reviewing
- Platforms for reviewing and discussing publications
(Publons, Pubpeer)
- Immediate publication with no formal review
(preprint)
- Immediate publication with post-publication review
- Open review

OPEN ACCESS

OPEN ACCESS MOVEMENT

- 1990 First online-only journal
- 1991 First subject repository (arXiv)
- 2002 Budapest Open Access Initiative
- 2003 Berlin Declaration
- 2012 DORA Declaration

BERLIN DECLARATION

The Internet has fundamentally changed the practical and economic realities of distributing scientific knowledge and cultural heritage. For the first time ever, the Internet now offers the chance to constitute a **global and interactive representation of human knowledge** (...) and the guarantee of **worldwide access**.

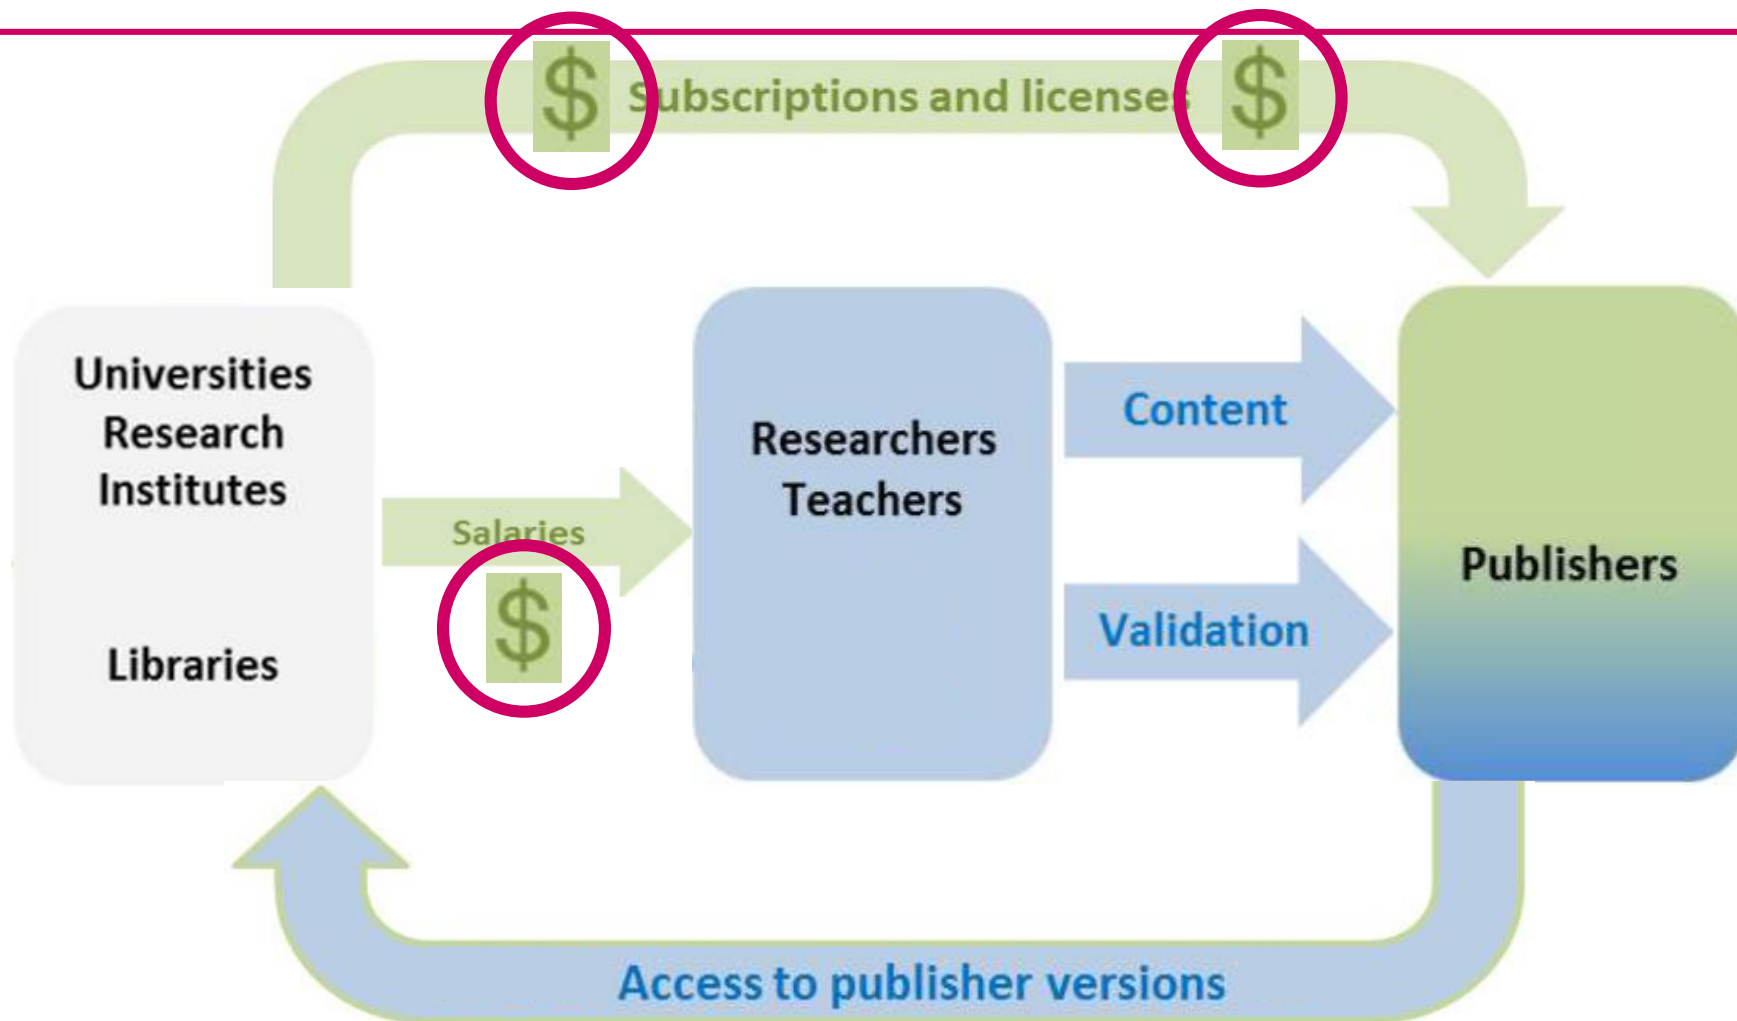

Our mission of disseminating knowledge is only half complete if the information is not made **widely and readily available to society**.

OPEN ACCESS EXPLAINED!

SUBSCRIPTION-BASED MODEL IS ABOUT COPYRIGHT TRANSFER

CLASSIFICATION OF OPEN ACCESS

Gold Road

All articles of a Journal are accessible for free on the journal's website

Green Road

Self-archiving on an institutional repository

Hybrid

Subscription Journal, but options to make individual papers open for a fee

GOLD ROAD

- Processing Charges can be required
 - ✓ **Article Processing Charge - APC**
 - ✓ **Book Processing Charge - BPC**
- Journal list available on <https://doaj.org>

PREDATORY JOURNALS

CLASSIC GOLD OPEN ACCESS JOURNAL

PREDATORY JOURNAL

PREDATORY JOURNALS' PRACTICES

A wide array of **unethical business practices**, such as

- **Fraudulent claims**: about where they are indexed, impact factors
- **False pretense**: copying names and designs of established journals
- **Deceptive promises**: implausible swift publication, yet peer review
- **No transparency**: about quality control, fees, copyright, withdrawal and digital archiving
- **Fictional editorial boards**, or using the names of recognised researchers without their knowledge !
- **Spam** emails, sometime overly flattering

Adapted from **SNSF** 2018

WHY COULD IT BE A PROBLEM?

- For the researcher / its institution / funder
 - Lack of credibility
 - Your paper won't be accepted in an another journal
 - Lack of visibility
 - Lack of long-term storage
 - Your name can be associated to one of those journals

WHY COULD IT BE A PROBLEM?

- For Science itself:
 - Difficulty to distinguish good peer-reviewed articles from low quality papers
 - Decrease of general science quality
 - Almost impossible to obtain a retraction (some bad articles are still findable)
 - Waste of resources (good research do not get the visibility they deserve)

IF SOMETHING IS FORMATTED LIKE A SERIOUS SCIENTIFIC PAPER, IT CAN TAKE ME A WHILE TO REALIZE IT ISN'T ONE.

PREDATORY JOURNALS

How to prevent it?

Choose the right journal for your research

<https://thinkchecksubmit.org/check/>

CLASSIFICATION OF OPEN ACCESS

Gold Road

All articles of a Journal are accessible for free on the journal's website

Green Road

Self-archiving on an institutional repository

Hybrid

Subscription Journal, but options to make individual papers open for a fee

GREEN ROAD

1. Author publishes in a Journal of his/her choice
 2. The author him/herself posts the article to an **open-access repository** (e.g. Archive ouverte of UNIGE)
- ⚠ Depending on the journal:
- Some **versions** (e.g. Publisher's PDF) can not be posted
 - An **embargo** period may apply

ARCHIVE OUVERTE UNIGE

UNIVERSITÉ
DE GENÈVE

Archive ouverte UNIGE

Français

Home

Welcome to Archive ouverte UNIGE

Archive ouverte UNIGE is the digital repository of the scientific patrimony of the University of Geneva. It has been created to harvest, conserve and give the largest possible access to the publications of the professors and researchers of the institution, following the recommendations of [Open Access](#).

Participation in the deposit of intellectual production offers major advantages: increase of visibility of research projects and quick dissemination, acceleration of scientific exchanges, guarantee of stable and enduring access to the resources, enforcement of the directives of the Swiss National Science Foundation SNF.

A team of correspondents has been formed to answer all enquiries. Do not hesitate to [contact](#) them.

Overview of the last 5 documents deposited in the Archive

	High-efficiency superconducting nanowire single-photon detectors fabricated from MoSi thin-films	Verma, V. B.; Korzh, Boris ; Bussieres, Félix ; Horansky, R. D.; ... Nam, S. W.	2016-06-01 13:54
	Absolute calibration of fiber-coupled single-photon detector	Lunghi, Tommaso ; Korzh, Boris ; Sanguinetti, Bruno ; Zbinden, Hugo	2016-06-01 13:52
	Afterpulsing studies of low-noise InGaAs/InP single-photon negative-feedback avalanche diodes	Korzh, Boris ; Lunghi, Tommaso ; Kuzmenko, Kateryna; Boso, Gianluca ; Zbinden, Hugo	2016-06-01 13:50

CREATIVE COMMONS

WHAT DOES THE REQUIRE?

As of **2020**: all publications resulting from SNSF funding have to be available in OA (articles, books...) -

<https://oa100.snf.ch>

You can choose:

 **The gold road.** APC will be covered by SNSF, but **not for hybrid journals** (<https://oa100.snf.ch>)

 **The green road.** Publish in a subscription journal, then share via a public repository (embargo can not be longer than **6 months for an article, 12 months for a book**)

 Hybrid is not a valid option for a funding by SNSF !!!

WHAT IS THE PLAN S ?

- Initiative for Open Access launched in September 2018
- Supported by **cOAlition S**: international consortium of research funders

National funders

Charitable foundations

Supporting statements

Supported by

WHAT IS THE **PLAN S** ?

As of January 1st, 2021:

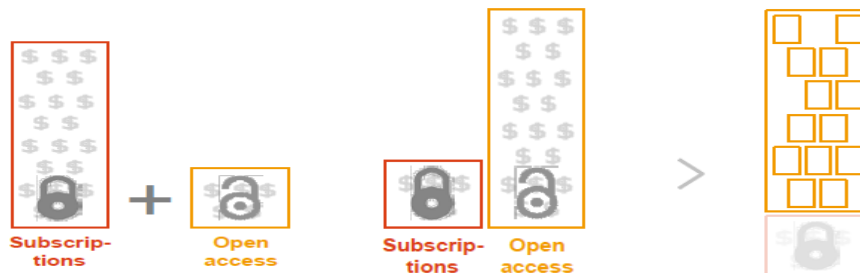

- All scholarly publications (VoR or AAM) must be immediately openly available (**no embargo period**)
- Must be accessible under an open license allowing for re-use (**CC BY license**)
- **No hybrid journals** (ok in a transition period, only if transformative agreements, such as «Read & Publish»)
- Journals must be registered in the **DOAJ**

WHAT ABOUT swissuniversities ?

- **National Open Access Strategy** (2017): all publicly funded publications have to be freely accessible from **2024** onwards.
- This vision is in line with current European models.
- Allows  and  roads.
- Action plan: negotiations with international publishers, national monitoring...

PUBLISHERS' NEW MODELS

- **Platinum Journals**: no APC (financed by institutions, learned society...)
- Licences «**Read & Publish**»: bundle together access to a publisher's subscription content with the ability to publish openly through its journals without paying individual APCs
- Licences «**Publish & Read**»: the institution pays for a subscription for publishing, and it also includes access to read the contents

Kai Geschuhn (Max Planck Digital Library), *Transformative Open Access Agreements*, Workshop on Data Analysis for Open Access Agreements, 13 September 2018, ETH Zurich

NATIONAL NEGOTIATIONS

- **Wiley**
 - ✓ The declaration of intent concluded with this publisher foresees the continuation of negotiations with the aim of concluding a "Read & Publish" contract in 2021.
- **Elsevier**
 - ✓ A declaration of intent foresees the conclusion of a "Read & Publish" agreement valid from January 2020, which must be fully negotiated by the end of March 2020.
 - ✓ Access to academic publications and researchers in the Swiss academic community should not pay publishing fees.
- **Springer Nature**
 - ✓ The negotiations failed
 - ✓ **Springer Nature articles published starting in January 2020 will be inaccessible** to the entire Swiss academic community via university library subscriptions, cut-off is effective from 1 April 2020.

UNIGE OPEN ACCESS POLICY

- ✓ Obligation for all UNIGE collaborators to deposit a copy of their publications in **Archive ouverte UNIGE** (§2 of institutional Policy)
- ✓ Obligation to select the **most open access** level possible (§4)
- ✓ Both **VoR** and **AAM** are accepted

Institutional policy

https://archive-ouverte.unige.ch/pages/unige_policies

UNIGE SUPPORTS OPEN ACCESS

Publication fund:

<https://www.unige.ch/biblio/en/openaccess/publication-fund/>

- Journal in the DOAJ (no hybrid journals)
- Covers half the amount of APC or BPC, but a maximum of CHF 1'000 (fully covered up to CHF 500)
- Requester is employed since 2015, or later

Archive ouverte of UNIGE: <https://archive-ouverte.unige.ch/>

Open Access Publications: <https://oap.unige.ch/>

Unpaywall: <https://www.unige.ch/biblio/fr/unpaywall>

everything that counts cannot necessarily be counted.”

Albert Einstein

GAME: THE HIDDEN SIDES OF BIBLIOMETRIC INDICATORS

WHY ?

A young researcher in
biomedical sciences has a higher h-index than
a colleague in education sciences.

WHY ?

WHY ?

An author would rather write reviews than
research articles.

WHY ?

WHY ?

You could have a higher h-index than the first
Nobel Prize
in your field.

WHY ?

WHY ?

Energy and Environmental Science has a
CiteScore of 30.87 and
Journal of Field Archaeology a
CiteScore of 1.1.

WHY ?

WHY ?

Some editors ask authors to add in their bibliography references from the journal in which they want to publish.

WHY ?

WHY ?

A young author who published a few reviews but still no research article has an higher h-index than an author with a first publication of his/her own research results.

WHY ?

WHY ?

The article "Waves on the surface of the Orion molecular cloud", published in 2010 has been cited only 20 times since then (within Web of Science) whereas it has been published in *Nature* whose IF is 41.577.

WHY ?

WHY ?

The article "Rethinking plagiarism in the digital age" has been cited 84 times after Google Scholar but only 25 times after Web of Science.

WHY ?

WHY ?

An experienced lab assistant has an higher h-index than a PhD with 2 publications as first author.

WHY ?

WHY ?

Denis Duboule has an
h-index of
83 in Google Scholar and of
74 in Web of Science.

WHY ?

WHY ?

An author always adds references from all his/her previous publications in the bibliography of his/her articles.

WHY ?

DORA DECLARATION

General Recommendation:

1. Do not use journal-based metrics, such as Journal Impact Factors, as a surrogate measure of the quality of individual research articles, to assess an individual scientist's contributions, or in hiring, promotion, or funding decisions.

ONLINE SCIENTIFIC ID

WHY CREATING YOUR ONLINE ID?

"Publish or Perish"

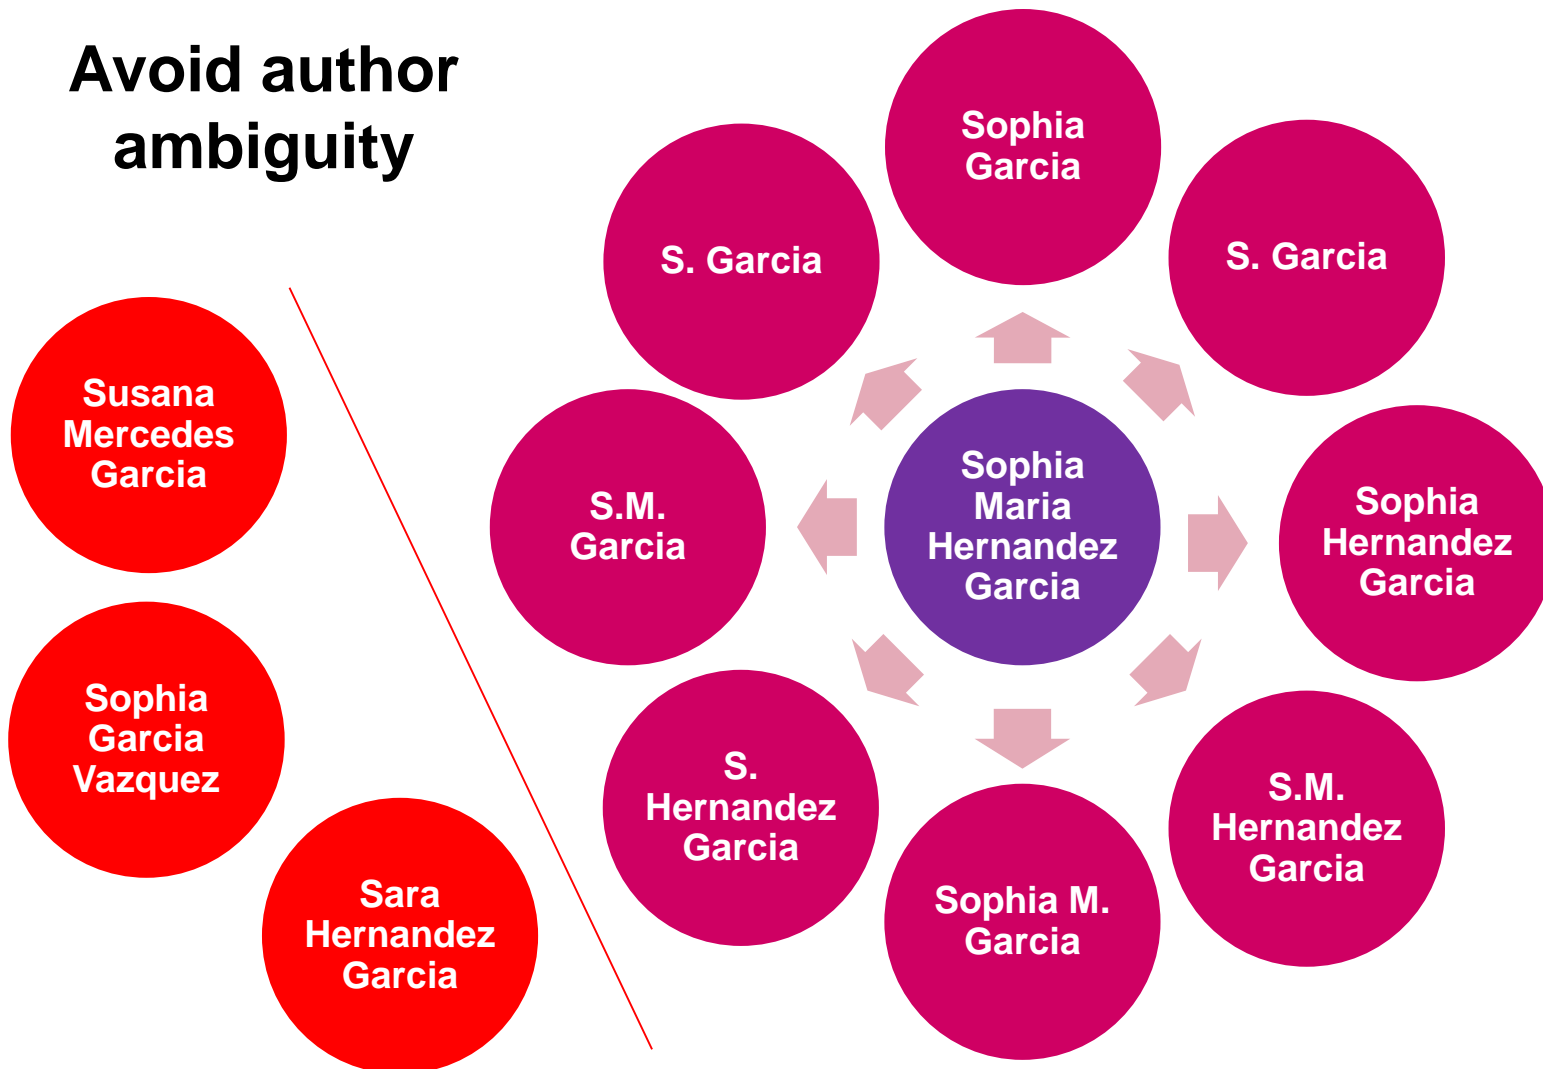

"Be Visible or Vanish"

Be visible in a coherent way:

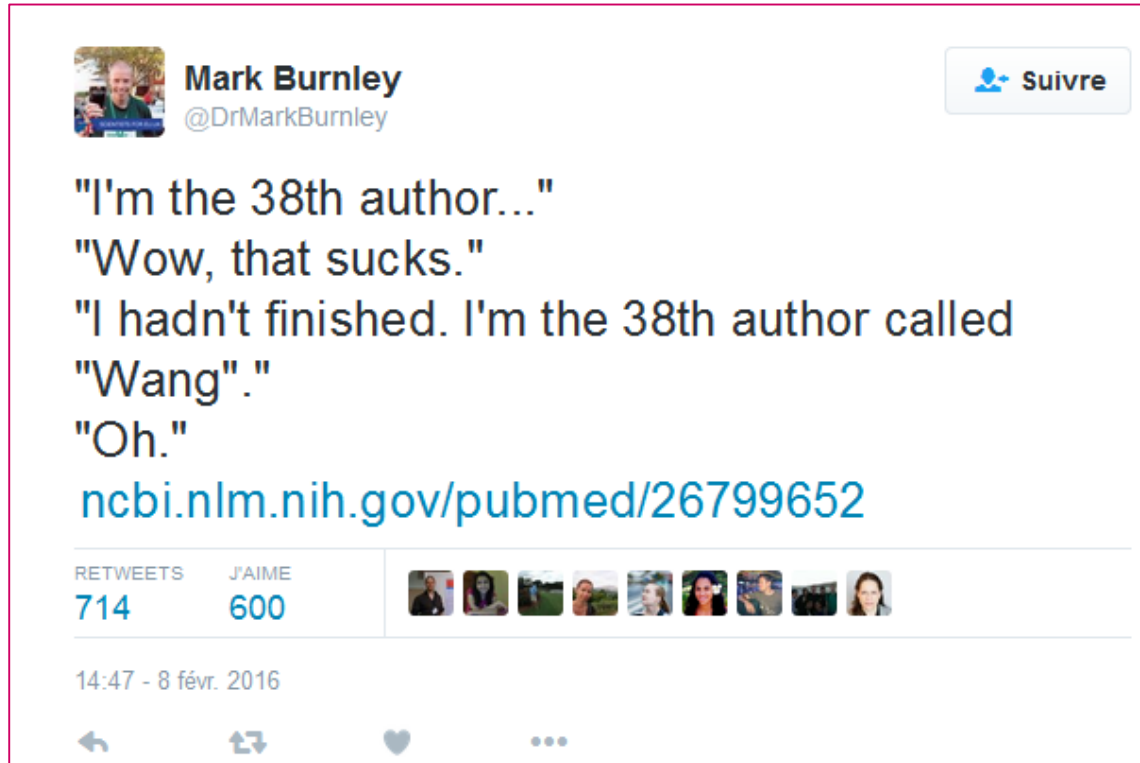

- Unique identifier
- Online resume
- Academic social networks
- Non-academic social networks

WHY HAVING A SCIENTIFIC ID?

Avoid author ambiguity

HOMONYMY ISSUES

 **Mark Burnley**
@DrMarkBurnley Suivre

"I'm the 38th author..."
"Wow, that sucks."
"I hadn't finished. I'm the 38th author called
"Wang"."
"Oh."

AIMS OF ORCID

- Help the transition from science to **e-science**
- Provide each researcher with a constantly **updated digital CV**
- Other organizations will use the open-access ORCID database to build their own services

HTTP://ORCID.ORG/

The image shows a screenshot of the ORCID website homepage. At the top, there is a search bar and a navigation menu with links for 'FOR RESEARCHERS', 'FOR ORGANIZATIONS', 'ABOUT', 'HELP', and 'SIGN IN'. The ORCID logo is on the left, with the tagline 'Connecting Research and Researchers'. The main content area features a large heading 'DISTINGUISH YOURSELF IN THREE EASY STEPS' followed by a paragraph explaining the benefits of ORCID. Below this is a numbered list of three steps: 1. REGISTER, 2. ADD YOUR INFO, and 3. USE YOUR ORCID ID. On the right side, there is a sidebar with a large 'iD' logo and a green arrow pointing down, and a 'LATEST NEWS' section with three news items dated from 11/17/2014 to 11/21/2014.

CASE STUDIES

CASE STUDIES

1. How to choose a journal?

2. Who should be author?

3. How to comply with OA and copyright?

GUIDELINES FOR THE GROUP WORK

13:00-
14:00

Preparation in groups:

- Read your case
- Read the provided documentation
- Prepare a PowerPoint following the given instructions

14:00-
16:00

Presentations:

- Max. 30 min. for each case
- 15 min. for the presentation
- 10 min. for the discussion

1. HOW TO CHOOSE A JOURNAL?

Study case

Professor David Horisberger advised his PhD Colin 4 journals in which Colin should publish his new method for Alzheimer disease study in rats, originally developed for Huntington disease study.

- Before answering him, the student considers those 4 options
- He prepared a table as a base of discussion with his professor;
- He thinks that 2 journal candidates could be selected amongst the pre-selected 4;
- His project thesis was financed by SNSF.

Target

Explain to participants which 2 journals Colin may have selected?

1. HOW TO CHOOSE A JOURNAL?

A journal choice is personal!

- ✓ Avoid publishing *only* in experimental Open Access journals as a young researcher
- ✓ Avoid relying *only* IF journals, providing that Open Access could insure you also an interesting visibility, maybe helping your citations, altmetrics, or h-index
- ✓ Once your scientific carrier is well established, try to find new way of publishing allowing the development of sustainable Open Science?

2. WHO SHOULD BE AUTHOR?

Study case

The PhD student **Marie Schuller** is writing an article on pro-biotics supplementation:

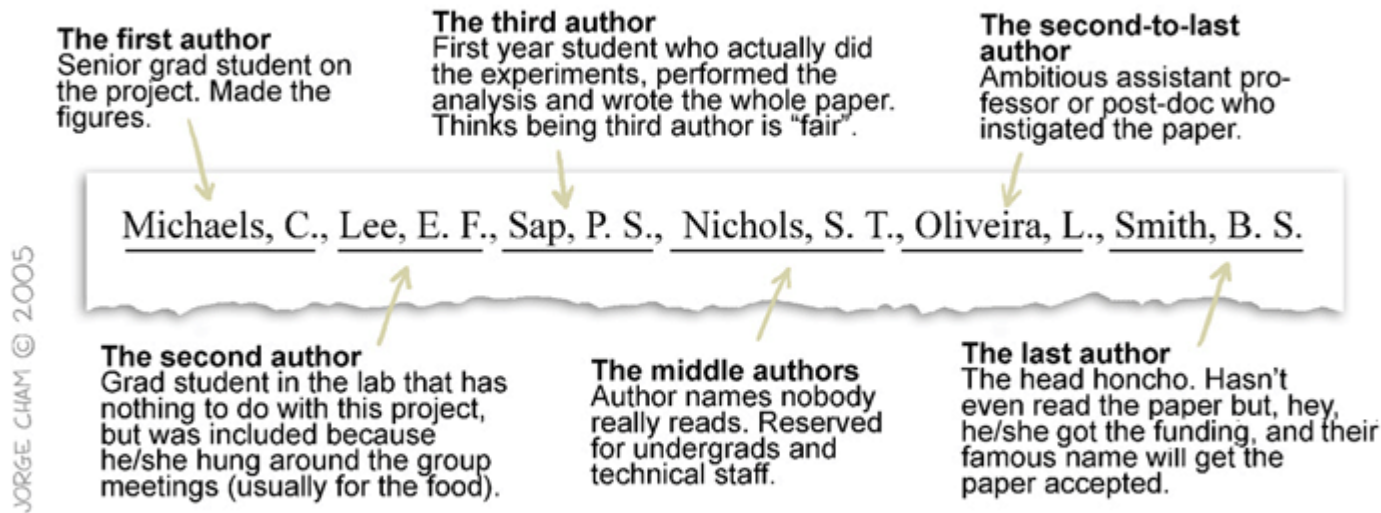

- She is writing the article together with **John Imrak**, a post-doc student located abroad. They both processed Marie's data.
- She generated her own data, but combined them with non-published older data from a former lab PhD, **Stefan Aragno**.
- Marie designed the experiment together with **Marc Hindermülle**, a statistician.
- **Paul Vinze** is Marie Schuller's Professor and raised the project funding money. He read the article when the writing of Marie and John was finished and was very happy of the work and conclusions, allowing Marie to submit her article to a journal. Prof. Vinze's chair is funded by Nestlé and Roche.

Target

Who should be mentioned as an author on Marie's article?

2. WHO SHOULD BE AUTHOR?

THE AUTHOR LIST: GIVING CREDIT WHERE CREDIT IS DUE

<http://phdcomics.com/comics.php?f=562>

WWW.PHDCOMICS.COM

Co-author content responsibility is engaged!

- You may not know that a co-author commits plagiarism, misconduct or scientific results fraud, if you are not actively involved in the publication
- Due to development of post-review tools and fast relay of information on Internet, your scientific and e-reputation can be attacked, even years after publication

3. HOW TO COMPLY WITH OPEN ACCESS AND COPYRIGHT?

Study case

You are given 5 articles and corresponding self-archiving full texts.

Target

Complete the chart and find the 2 best self-archiving practices, for copyright and OA compliances

3. HOW TO COMPLY WITH OPEN ACCESS AND COPYRIGHT?

Anyway self-archive your article!

- Self-archive in institutional and/or subject repositories to allow long-term archiving. Avoid to rely *only* on social and/or scientific social media Linked-in, Academia, or ResearchGate
- Self-archive your articles within 6 months with the right type of manuscript to comply with copyright
- Comply with copyright for your researcher professional credibility!

THANK YOU FOR YOUR ATTENTION
